Denise Pakala	Covenant Seminary, BRIDGES
Fran Stumpf	Linn State Technical College (proxy for Stephen Wynn), LANCE
Anna Zaidman	Saint Louis University (PIUS), SLU
Jennifer	

Members Absent:

???

1. Call to order by Renee Brumett
2. Adoption to the agenda
3. Minutes from the Oct. 19th, 2012 meeting were approved.
4. Old Business:

Update on Syndetics: Denise said that the free materials link was still at the bottom of the record and asked if it could be moved higher? There were no objections.

Megan is still working on the table of contents issue.

RDA Fields: Megan announced that the 336-338 fields are all suppressed in the clusters and asked if there were any questions. There were none.

Megan also recommended that we maintain displaying both the 260 and the 264 fields in the catalog. Denise pointed out that it is a temporary issue, as new RDA records should only have 264 fields. As of now, there are very few records that use both the 260 and 264 fields.

The question was raised if both fields should display in the central catalog. All agreed.

5. New Business:

Icons for Material Types: Megan informed the group that there were some new icons available for material types, and that some of the clusters are looking at adding material types. She is working on mapping that will show how each cluster's material types display in the union catalog. She will share the newly available icons on the MCDAC listserv. Megan also said that she is still working on the issue of the archive icon displaying for some of the libraries.

RDA preparation : Denise asked what each cluster was doing with regards to RDA preparation. Most indicated that they are slowly working towards the new rules, but at varying speeds.

6. Meeting adjourned.
