

1. Call to order and introductions
2. Adoption of the agenda
3. Approval of minutes
4. Subject searching in MOBIUS. (LANCE)
If you use the drop-down menu of the left side of screen to search LC, MeSH or Children's subjects that works well, But if I choose the "type of search" on the right side search box, subject searching does not specify what type of subject. It seems to give you only the LC subjects when searching here. Do we need the right-hand list of search options? If we choose to keep it, then it should offer the same options as of the left side drop-down menu.
5. Request for revision and addition to documentation on the MOBIUS website. (WashU)
The information in "Bibliographic Index Rules" needs to be updated (e.g., inclusion of the Genre index), and information on the tags, order, and labels for fields that appear in MOBIUS record displays would be a useful addition to the website (perhaps MCO could post the MOBIUS Record Display Definition File (webpub.def)).
6. Request for turning on the 945 field display in MOBIUS MARC records (web option: IRMARCDISP = true). (WashU)
The Local PAC field contains useful information identifying the contributing local server, the bibliographic record number at the local server, the record number of the institution record, and the master record holder (see Manual page #103348; also see OhioLINK for live examples, e.g.: <http://olc1.ohiolink.edu/record=b27830666~S0>).
7. Issue of "orphaned" master records. (WashU)
Although the owner of a master record may have removed its holdings for that record from the catalog, the ownership of the master record does not always pass as it should to the next institution in line. A WASHU example is <http://mobius.umssystem.edu/record=b14071489~S0>. When this occurs, the former/alleged owner can neither fix the problem nor, of course, maintain the display of the bibliographic record in the MOBIUS catalog. Is there a process that MCO or Innovative can run to identify and fix these?
8. 028 indexing in MOBIUS (WashU)
I found some cases where the 028 fields in MOBIUS is not making it into the music number index, for no apparent reason. Please see OCLC # 3087360, 8175699, 3367559, and 9270726. For the first-named record, I've asked Wendy Sistrunk at UMKC to overlay their record with an improved version from OCLC, so it will be interesting to see if that process (provided she does it) gets the number into the index. I think, also, that UMKC is the master record source for all four, so maybe that is a factor.
9. Other business.
10. Adjournment.
