

Minutes of the
Arthur Coordinators and Technical Services Committee Meeting
October 18, 2011, 9am via GoToMeeting

Members Present:

Corrie Hutchinson, Chair	Stephens College
Nason Throgmorton, Member	Columbia College
Genevieve Dazet, Member	Missouri State Library
Tom Leimkuehler, Member	Missouri State Library
Corinne Caputo, Member	Westminster College
Tom Schultz, Member	William Woods University

Members Absent:

Vandy Evermon, Member	Columbia College
Inas El-Sayed, Member	Lincoln University

Guests or Proxies Present:

Scott Peterson	MOBIUS
Adrienne Detweiler	MOBIUS

1. Call to order and introductions commenced at 9:10.
2. Adoption of the agenda: The agenda was adopted with the addition of New Business: record suppression suggested by Nason.
3. Approval of minutes: No modifications were suggested and the minutes were approved.
4. Information Items
 - a. Backstage: the profile for the treatment of series (440 and 490 fields) in the bibliographic record has been changed at Backstage to reflect the decision of the committee.
 - b. 700 |e: the bibliographic load table has been modified to not remove the |e from the 700 field during import.
 - c. MESH: Corrie had been instructed to look into removing those headings from the MARS Reports. She reports that it has not been done and will work to complete it by the next meeting.
5. Unfinished Business
 - a. Update on Gutenberg record load: Tom S. sent out a questionnaire needed from each institution that wishes to take part in the Project Gutenberg record load. Tom S. did not receive responses from all members outlining the specifications. Tom S. will resend the questionnaire to the committee with a firm deadline.

- b. Library of American Civilization records: Corrie stated that she could not find online how to load the MARC records for the LAC collection containing the link to the free online resource. Columbia College already has all the bibliographic records available in the catalog for the microfilm and has added an 856 which searches Google Books for the online e-book version. There was discussion on how best to search, show, and inject the appropriate 856 link into these bibliographic records. Scott will work towards finding an automatic way of inputting the 856 fields in the appropriate records along with Nason and Corrie.
6. New Business
- a. Link checker: Corrie opened a ticket with MOBIUS and received a quote from III for the purchase of the Link Checker. Corrie stated that she shared the price with the Arthur Director's committee and received no feedback from the committee indicating a strong desire to move forward and purchase. After much discussion, the committee agreed to not purchase the product at this time but leave the option open for future need.
 - b. 776 2nd indicator 8: The 776 field is for additional physical form entry and is becoming more popular as it contains information to related forms (i.e. online versions). An example was viewed and the issues of how it is displayed in the OPAC and the use for it was discussed. It was moved and approved that the field should be suppressed from the OPAC for now.
 - c. 3xx fields in RDA: The discussion of the 3xx fields that deal with content type, media type, and carrier type were discussed. These fields are new as a result of RDA and are showing up in red in Millennium and showing up under 'Descript' in the OPAC. Concern was expressed about them being visible in the catalog, which could confuse patrons, and that officially the cluster has not adopted RDA. It was moved and approved that the fields should be suppressed from the OPAC for now.
 - d. Order record code2: It was brought to the committee's attention that these fields had been changed without notification and consent of the committee as a whole. After much discussion on the use and subjects specifically, it was decided that no changes were needed to be made at this time. However, the committee strongly feels that no fixed field codes should be changed which affect the entire cluster without appropriate committee consent beforehand.
 - e. Record suppression: Nason asked, on behalf of Vandy, if anyone had noticed a problem arising from an item record being suppressed but the bibliographic record still showing up in the OPAC because the bib was a shared record. No one was able to give any advice, save Adrienne and Scott who suggested that Nason and Vandy get in touch with the MOBIUS office to discuss possible solutions.
 - f. New OPAC: Nason inquired as to whether anyone knew what was exactly indexed in the main page drop down under 'Resource Name'. No one had any answers so the question will be posed to Jessica (at MOBIUS) and possibly APS to look for answers.
7. General discussion: general discussion involving the licenses under Sierra and using location codes to ease access to e-books was discussed. The next meeting date is March 15, 2012.

Minutes of the
Arthur Coordinators and Technical Services Committee Meeting
October 18, 2011, 9am via GoToMeeting

8. Meeting adjourned at 10:06.

Minutes submitted by Corrie Hutchinson, October 18, 2011.
