

Notes from coordinator's meeting, Dec. 1

1. Discussed extensive revisions for the Webpac. Joni will have the chosen logo (Arthur with long sword above it) revised to specifications. Jim will post a mock-up on the Westminster server for us to see what the changes look like. Marcia will give Bob the detailed list of changes for the actual Webpac.
2. Discussion of journal scoping vs. indexing. If we use the index, III will add a 229 field for current records. We would need to add to any new serial records. This issue will be discussed at the catalog design committee meeting and they will make a recommendation or decision.
3. Decided to upgrade to the new version of III as soon as our record loads are done. Gary will do it in the evening, and it usually does not take very long. The upgrade will be completed before we go live so that we can learn the new features.
4. Agreed on a list for Scodel. Joni will update in the system.
5. Circ parameters need to be done by Dec. 6 so the trainers can review them before training. The passwords for functions 101-200 will be enabled.
6. The GUIcat search box and telnet menu will be rearranged so that the most frequently used searches will be listed first. Both versions will be the same. Robin will do what she can do, and send the request to III.
7. Questions about serials were discussed and appropriate use of the "Identity" and "Library Has" fields were agreed upon.
8. Robin showed us the MERLIN web page where catalog standards are published. The Arthur cluster will also have a page provided by MCO where we can post standards, contacts, minutes, and other important information to share.
9. The cluster authorized Joni to vote in favor of the ILL proposal from the access services committee.
10. Marcia reviewed items she will report to the MOBIUS Council on Dec. 3
11. The next meeting has been tentatively set for Dec. 17, starting at 9 am in the MOBIUS office. The technical services group will meet the same day following lunch. Starting Jan. 7, we plan to meet at least the first Friday of every month, and possibly more often.
