

November 30, 2012

## **Approval of Minutes of Apr. 20<sup>th</sup> meeting- approved**

## **Report of MCDAG meetings July 13 & Oct 19**

### **A. July 13**

- Just a standard number index and a music number index in the MOBIUS catalog. Rules on how things are indexed on the MOBIUS website.
- Merlin- wanted to change how purls look in MOBIUS catalog. Requested for directors to discuss that we change our purls be done the same in MOBIUS catalog.
- Chose a new chair of MCDAG. Springfield – Green: Renee Brumet.

### **B. Oct 19**

- MOBIUS is by Syndetics. KCAI – should only affect KCAI scope.
- 490 -0 to be traced 490-1 want it to be indexed. Merlin may be doing this, but not MOBIUS
- Merlin- Genre headings- with conflicting forms. Proposed a table of a hierarchy of those with the most acceptable. List may serve as a guideline for others.
- RDA discussion of different fields. 336-338 fields being suppressed from display 264- publishing statement how they are displayed.

## **Old Business**

## **New Business**

- A. Ebrary Titles- KCAI added Ebrary titles and had a proxy problem.
- B. Cluster standards- don't have any. Look to Merlin's standards. 490-0 to a 490-1 if you want it traced and add an 830. Get rid of 029 fields. If you have a code that is not in there, you can add it or bring it to the group (i.e. language code)
- C. Series treatment after authority processing (440 fields) - things that are a 490 field are being changed to a 440 after authority processing. Ted will ask MOBIUS.

D. 264 field in bib records- Starting to see in OCLC for publishing. Susan is changing to 260, Ted is putting in an additional 260. Will begin to add a 260 and leave it alone for 264. Can have separate indicators ones for publisher, distributor, etc.

E. Table of Contents (970 fields) display in catalog. Enhanced content (from Syndetics, content enrichment) took out 505 and added 970. Adjourn the discussion to next meeting. See if KCAI adding to Syndetics affects this with the 550 fields.

F. Other-

Susan question- WJ buying independent Ebrary books. They want to add on item record to the bib and Avila too.

Book / Journal icon. – that runs off of the material type field. Mobius can create a separate Material type field. Request that an icon be created. Then need create a list of serials to change to the new material type. Access committee needs to determine the parameters and the wording of what the journal/ serial.

## **Member reports**

MBTS- Going to load their catalog Ebsco discovery tool.

WJ- construction going well

St. Paul- feasibility studies now for moving. Looks like we will be moving, don't know whether it will be moving it all.

## **Next Meeting date-**

Likely early February-
