MCAG chooses option 3, cancel it.

Agency is not user friendly. Our reasoning:

Option 1: We are concerned about losing the many links to online resources from the MOBIUS catalog, particularly federal and state publication links. Removing the links from the MOBIUS catalog would require the patron to dig even deeper to access online resources.

Option 2: It is confusing as it creates a long redundant list in the holdings display. It complicates the display resulting in longer pages and more text.

The URL checker is another issue with access not viable for many in MOBIUS if changes were made.

Agency needs to be a great enhancement for the libraries of MOBIUS; the disadvantages outweigh the benefits.
