Guests or Proxies Present:

[Name], [Group position, if applicable]	[Institution name and, if applicable, Cluster name]
---	---

1. Approval of minutes

Last minutes approved.

2. Unfinished Business

a. Item/circulation status codes

Donna asked Jim to talk to chair of Access Advisory Group to discuss the status codes to discuss which group should review their use. MAAC will review them. The percent sign is a system supplied status and should not be used it for anything else. Though it is not stated in the in Manual that is what the INNreach system does in effect.

b. Keyword stop list

There is a list on the website: mobiusconsortium.org/inn-reach-stop-phrases This is a permanent list. The question was raised as to whether it possible to limit by mattype ebooks in MOBIUS? It is.

The potential for a stopword problem is about 50,000 and watch for it to process, watching your queue to central.

3. New Business

Children's subjects appearing at the bottom of the MOBIUS display. On most systems it appears following LC/MESH subjects—at least above standard numbers.

4. Next meeting in January 13, 2012.

Submitted by Jim Dutton from notes by Mary Aycock.
