

1. Call to order and introductions
 - Rotate minutes?
2. Adoption of the agenda
3. Approval of minutes from July 13, 2012
4. Information Items
 - MOBIUS Board voted to purchase Syndetics for the union catalog – includes summaries, table of contents, book images
 - SGCL Sierra migration
5. New Business
 - **Discussion of including indexing the 490 field in the current re-indexing project – Mary Aycock, MERLIN**
 - There's been an issue that MU has raised about the differences in the indexing of the 490s. Has the re-indexing project been completed? If not, is changing the indexing of the 490s something that MCDAC is interested in pursuing?
 - Basically, MERLIN indexes the 4900_ as a series as a response to the decision of LC not to trace unnumbered series back in 2006. However, it looks like MOBIUS does not index the 4900_, leading to differences when users search the cluster vs. MOBIUS and also, in the example below, between records that have the series in the 830_0 vs. the 4900_.
 - Example I got today. The series is indexed in the first, but not the second.
 - Using math to design a roller coaster
 - 830 0 Mathworks!
 - <http://searchmobius.org:80/record=b22482819~S0>
 - Using math to build a skyscraper
 - 490 0 Mathworks!
 - <http://searchmobius.org:80/record=b26026595~S0>
 - **MERLIN genre/form hierarchy changes– Mary Aycock, MERLIN**
 - Here is the genre/form hierarchy proposed by MU (raised in another meeting). MERLIN will go ahead and implement it unless we hear any objection.
 - Here is the hierarchy to use when our genre/form thesauri terms conflict/overlap. The terms lower in the hierarchy would be deleted and replaced with terms from higher in the hierarchy.

- lcgft
 - lcsh
 - mesh
 - aat
 - gsafd
 - rarebooks
- Here are a few examples:
 - “Comedy \$v Feature” from migfig would be replaced by “Comedy films” from lcgft
 - “Humorous fiction” from gsafd would be replaced with “Humorous stories” from lcsh
 - “Adventure films” from gsafd and “Adventure \$ Feature” from migfg would both be replaced with “Action and adventure films” from lcgft
- **Display of RDA records in the union catalog, particularly fields 264 and 336-338– Bryan Dunlap, MRRL**
 - Has there been any discussion about how RDA records display in the consortium catalog? For instance, the 260 field (AACR2) is being replaced with a 264 field (RDA). However, the 264 field does not display at least in our(MRRL's) current configuration.
 - What about the 245 \$h (GMD) being replaced with the 336-338 fields? Again in our catalog, we've decided to suppress the 336-338; however; they display in the consortium catalog under the description label with no identification as to what they mean.
 - Do we need to have some sort of standardized cataloging rules or can we tweak the display to accommodate the new fields?

6. Adjourn Meeting
