

MOBIUS Task Force on Governance and Growth Management

**Public Library Interest in MOBIUS – Survey Results
October 2005**

Compiled by Erlene Dudley

I. Introduction.

A survey to determine the level of interest on the part of Missouri's public libraries in cooperative resource sharing programs, such as MOBIUS, was developed by a subcommittee of the MOBIUS Task Force on Governance and Growth Management. Members of the subcommittee are Donna Bacon, Springfield-Greene County Library; Margaret Conroy, Missouri River Regional Library; Valerie Darst, Moberly Area Community College; Erlene Dudley, William Woods University (chair); Elizabeth McDonald, Lindenwood University; Stephanie Tolson, St. Charles Community College. The survey (Appendix A) was mailed to 170 public libraries directors on September 30, 2005, accompanied by a cover letter from the MOBIUS Task on Governance and Growth Management (Appendix B). Mailing labels were generously provided by the Missouri State Library.

II. Return Rate.

Eighty-six (86) surveys were returned for a **return rate of 50.6%**. One library director answered only questions 4-6 stating that she could not answer questions 1-3 without input from her board. Another library director returned the survey but didn't answer any of the questions stating that they do not have computers in their library and the heat and a/c are on only when volunteers are on duty!

III. Summary of Survey Results.

The following information summarizes the results of the survey. Note that not all respondents answered all questions.

1. Does your library have any interest in participating in a statewide online system which would include web-based direct patron borrowing of materials from all participating members and delivery of library materials by courier between libraries, such as that enjoyed by the current MOBIUS Cooperating partners?

VI. Conclusions.

- More than half of the respondents to the survey (60%) are **very or somewhat interested** in a statewide online system which would include web-based direct patron borrowing of materials from all participating members and delivery of library materials by courier between libraries, such as that enjoyed by the current MOBIUS Cooperating partners.
- More than three-fourths (78.6%) of the respondents to the survey that are **very interested** in such a system are willing to provide all or some funding to support their participation.
- More than three-fourths (76%) of the respondents to the survey that are **somewhat interested** in such a system could participate only with outside funding.
- Almost half of the libraries that are **not interested** at this time or not interested at all in such a system do not have an online catalog available via the Internet (41%). There is some evidence that these are libraries with volunteer staffs and donated collections.
- More than three-fourths of the respondents (80%) have their catalog records in MARC format.
