

SWAN Cataloger's Meeting

September 9, 2011

Southwest Baptist University

Attendance

Raegan Wiechert, Becky Thompson, Marilyn McCroskey, Sarah Francka, MSU; Renee McHenry, Forest; Torsten Rothman, BBC; Becky Kiel, Cottey; Phyllis Holzenberg, Drury; Mary Griffith, OTC; Lydia Welhan, Christine Brock, Donna Pooley, MSSU; Mary Largent, Crowder; Rick Oliver, Juliana Tilden, AGTS; Susan Kromie, Colleen Rose, SBU.

Old Business (updates)~

Display of item location code rather than bib location

Torsten reported that bib locations had been changed in the webpac.

New MAT type for CD-ROMs

Lydia reported that Joe Hewitt said to wait to make changes until the 2009b update.

Upgraded bibliographic headings on rotational report

Everyone was thankful to Lydia for the elimination of everything on the rotational report but the blind references.

New Business~

MCDAC

MOBIUS pays for the number of bib records needing authority processing based on the cat date in the bib record. If record does not need to be backed up, change the cat date to a date prior to the last processing. If collection is not worth being processed, change the cat date so it will not be processed.

Merging/de-duping MSSU records

MSSU is now using Summon. When searching, items come from the Summon server not Millennium. If you come across records with the MSB, code for suppress. When deduping, keep MSB record and delete other. Ebrary records just downloaded, do not merge with print copy. If come across duplicate records for NetLibrary and Ebrary, keep both records.

Duplicate records report

Lydia reported that Ebrary records have been removed because the content license has expired. Heading reports that tell you if two duplicate records exist has been turned off. She will request that it be turned back on.

PyschBook ebooks

Forest has adopted PyschBook ebooks, and 2100 records have been downloaded. They need to be reloaded twice a year. If you want to attach a record to them, check with Forest so it does not get suppressed and reloaded.

Re-indexing

We are getting the genre and public note field indexes. We will run the old records through reindexing. It was decided to ask for 490 1_ in keyword and keyword to be reindexed.

Macros

Raegan discussed OCLC and Millennium macros. See the back side of the agenda for links.

Other

The next meeting will be at Missouri State University on January 13, 2012 at 1 p.m.
