

Created by: MOBIUS Executive Board

Adopted: MOBIUS Board, August 11, 2017

Purpose of the policy: Maintain control of linkages within the MOBIUS INNReach system.

Background:

When the MOBIUS system was first set up all libraries needed to have Innovative for their ILS before the INNReach system could be connected. Board approval is still needed before new libraries can become members, so MOBIUS still has oversight about what new systems might work satisfactorily with the system. However, it is now anticipated that other ILS systems may be able to work with INNReach in the future and it is imperative that MOBIUS be able to determine the acceptability of any other system which is being connected.

Content of the policy All MOBIUS member libraries will have an integrated library system which is approved by MOBIUS.
